**Subject:** RE: Heaton Planning (Simon Heaton) re: geological and hydrogeological information - Great Oak Opencast Coal Site - SCO.55/2013 M

Simon,

Please accept this email as confirmation that the ES Geological Section will fully reflect the 1992 Borehole Drilling information.

I can also confirm that the ES will also include consideration of and information about the water table for the site in the relevant Hydrogeological Section.

I can also formally confirm, on behalf of UK Coal Surface Mines Limited, that we are happy for all information relating to Job Reference 'Explorers Associates Job ref: Year 1992/the British Geological Survey website' to be made available to whoever wants it.

Could you please reply to Mike Grundy making these confirmations.

Regards,

David Green  
Area Planning Manager
